

**NAME**

**ddel** – delete a dmover job from the queue

**SYNOPSIS**

**ddel** *job\_identifier*

**DESCRIPTION**

The **ddel** command is a utility wrapper used to delete dmover jobs. **ddel** deletes jobs based on job identification strings obtained upon execution of **dsub**. See **qdel(1)** for more information.

**SEE ALSO**

**qdel**, **dstat(1)**, **dsub(1)**
